

The Governor's Office of Planning and Budget

Population Projections

The Governor's Office of Planning and Budget (OPB) is charged in state law (O.C.G.A. 45-12-171) with the responsibility for preparing, maintaining, and furnishing official demographic data for the state.

Periodically, OPB will update its population projections. These projections are prepared using the standard cohort component demographic methodology, relying upon recent historical fertility, migration, and age data.

In 2015, OPB released state and county residential population projections for the years 2013 through 2050. The following year the rest of the series was released. These projections include state and county level projections by age, sex, and race using baseline data from the Census Bureau's vintage 2013 Population Estimates.

If you have any questions about the population projections please contact Meaghan Ryan, (404) 656-3800 or Meaghan.Ryan@opb.georgia.gov.
