

DEPARTMENT OF AUDITS AND ACCOUNTS

270 Washington Street, S.W., Suite 1-156
Atlanta, Georgia 30334-8400

Greg S. Griffin
STATE AUDITOR
(404) 656-2174

December 21, 2020

The Honorable Brian P. Kemp, Governor
The Honorable Geoff Duncan, Lieutenant Governor
The Honorable David Ralston, Speaker of the House of Representatives
Members of the General Assembly

Ladies and Gentlemen:

I am pleased to submit to you the Georgia Tax Expenditure Report for FY 2022 prepared by Georgia State University on behalf of the Department of Audits and Accounts. This report was prepared for inclusion in the Governor's Budget Report as required by Georgia Code §45-12-75. A copy of this report will be made available to the public on the Governor's Office of Planning and Budget's website and is also filed as a permanent record with the State Auditor.

This report provides a comprehensive listing of the State's statutory tax provisions ("tax expenditures") that allow preferential tax treatment of certain types of taxpayers or activities. Although not direct government expenditures, tax expenditures represent an allocation of government resources in the form of taxes that could have been collected (and appropriated) if not for their preferential tax treatment. To the extent possible, the dollar value of each tax expenditure has been included in this report. It is important to note, however, that data for numerous tax expenditures is not captured by the Department of Revenue. In these instances, the lack of available information is either noted or an estimate, if possible, is provided. The data included in this report has not been verified or validated by the Department of Audits and Accounts and no opinion or other form of assurance is expressed in this data.

We appreciate the staff of the Georgia State University Fiscal Research Center for preparing this report.

Respectfully Submitted,

A handwritten signature in blue ink that reads "Greg S. Griffin".

Greg S. Griffin
State Auditor

Georgia Tax Expenditure Report for FY 2022

Prepared by the Fiscal Research Center of the
Andrew Young School of Policy Studies at Georgia
State University

December 2020

Funding for this project was provided by the Georgia Department of Audits and Accounts. We would like to thank the Georgia Department of Revenue and the Georgia Office of Insurance and Safety Fire Commissioner for their contributions to the preparation of this report. Lastly, we would like to thank the Georgia Department of Audits and Accounts for their comments and recommendations. All estimates presented in this report are the work of the Fiscal Research Center. We are solely responsible for its contents.

Introduction

Tax expenditures are provisions in the tax code that allow for special treatment of a source of income or a certain type of expense. Such treatment usually results in a reduction in tax liability for the taxpayer. In principle, these tax benefits could be provided by direct appropriation, thus these provisions are referred to as "expenditures". They represent tax revenues that would have been otherwise generated if not for this preferential treatment in the tax code.

Like direct government expenditures, tax expenditures are an allocation of government revenue that are intended to achieve a particular policy outcome or encourage some activity. The value of a tax expenditure can be thought of as representing the amount of money that would be necessary to provide the same level of financial support in the form of a government grant instead of through the tax code. Tax expenditures are received by businesses and individual taxpayers and are present in all of Georgia's major taxes, including the individual income tax, corporate income tax, and sales tax.

Tax expenditures, also referred to as tax preference items, can take several forms. Many are structured as tax credits and deductions, such as the corporate credit for hiring a new worker or the individual deduction for the mortgage interest paid on a primary residence. Other expenditures are in the form of exclusions of income. For example, at the state level, individuals in Georgia can exclude the value of Social Security benefits from the calculation of Georgia taxable income. Lastly, some tax expenditures may be provided in the form of reduced rates for selected taxable transactions, such as the reduced title ad valorem tax for rental vehicles and certain vehicle title transfers.

Tax Expenditure Report

Preparation of a tax expenditure report is required by the Official Code of Georgia Annotated §45-12-75. The purpose of the report is to list all tax expenditures and their value. In this way, these items can be tracked over time in a fashion analogous to a budget of direct governmental expenditures.

While direct expenditures for such items as education or transportation are reviewed annually with every budget, tax expenditures are often not subject to such periodic review. It is important to monitor the value associated with these provisions as they are a reduction in tax revenue and their presence results in special treatment for some taxpayers relative to others. For example, the state government supports education through direct expenditure programs and through HOPE scholarships but also allows a tax deduction for certain educational expenses borne by the taxpayer or paid by an employer. Both the direct expenditure and the tax expenditure represent an allocation of government resources toward education, but only the direct expenditures are listed in an annual budget.

Leaving tax expenditures out of the annual budgetary review process creates two types of distortions. First, it under-represents the amount of government resources allocated for a given purpose. Second, it incorrectly represents the distribution of the benefits of government expenditures. The benefits of tax expenditure provisions are usually targeted to higher income taxpayers compared to direct expenditure programs, so that the absence of tax expenditures in the overall analysis may lead to the conclusion that government resources are targeted toward less affluent taxpayers. In addition, not all tax expenditure programs have a direct budgetary counterpart, thus without a tax expenditure report, these provisions and their distributional effects escape notice.

The presence of tax expenditures is not necessarily bad tax policy. However, not recognizing or monitoring the resources allocated through the tax system is not good fiscal policy. Through this report, we hope to provide a consolidated listing of government resources provided through this means. This report does not, however, provide any information on how effective the provision may be in terms of fulfilling its purpose. For instance, while the value of the Research and Development (R&D) credit may be reported annually in the tax expenditure report, there is no accompanying analysis to determine the extent to which more research activities have been undertaken due to the presence of the special provision.

Identifying Tax Expenditures

In most cases, identifying a tax expenditure is straightforward. Tax expenditures are deviations or special exceptions from the generally defined tax base, sometimes referred to as the normal tax base or the reference tax base. However, there may be disagreement as to what constitutes the normal or reference tax base. Even at the federal level, the list of tax expenditure items included by the Administration differs from the list estimated by Congress because each works from a different definition of the standard tax base. The appropriate norm against which tax expenditures are defined is somewhat subjective and may, in some cases, be driven by the intent of the policy underlying the legislation. For example, one would not consider the difference between the current top income tax rate of 5.75 percent and the tax rate of 1 percent a tax expenditure.

Tax credits and deductions for certain types of activities, such as the jobs tax credit or the low-income housing credit, are always classified as tax expenditures. This is also the case for items that are taxed at a reduced rate. In addition, specific exclusions from the tax base are, in most cases, considered tax expenditures. Because the Georgia individual and corporate tax systems are both tied to the federal individual and corporate bases, exclusions or deductions at the federal level apply to the state tax base as well. In some cases, Georgia chooses not to conform to federal provisions, such as the Section 199 deduction for domestic production activities. In these cases, we do not include the provision as a tax expenditure. It is also important to note that tax expenditures are not computed for revenue that is due but not collected.

There are instances when it is unclear whether a given tax provision should be listed as a tax expenditure. This is because it is unclear what constitutes the general rule, and therefore, it is sometimes difficult to determine which provisions are exceptions to that rule. Consider the individual income tax exemption. Individuals are allowed to exclude an amount of income for each taxpayer included on the return, but this exemption of income is not considered a tax expenditure by all states. Another example is the provision allowing for the use of a single-factor apportionment formula in allocating income earned by corporations operating in more than one state. Because the general rule of the single-factor apportionment formula has been established at the state level, only deviations from that rule would be listed as a tax expenditure. Alternatively, if one considers the status-quo method of apportionment to be the equally weighted three-factor apportionment formula, any deviation from that rule, such as the double-weighted three-factor or single-factor apportionment formula, would be reported as a tax expenditure. This sort of problematic classification of tax expenditures also applies to the taxation of services under the state sales tax. Because state legislation refers to the purchase of tangible goods, the exclusion of services from the base may not be seen as a deviation from the general rule. On the other hand, if it is really the intent of the general rule to tax all consumption, then the exclusions provided to the consumption of services should be listed as a tax expenditure. In this report we attempt to incorporate as comprehensive a definition as possible.

Defining a tax expenditure in the case of the sales tax requires particular discussion. Because there is no federal sales tax, there is no list of federal sales tax expenditures to use as a starting point. For this report, we use the state tax statute as the basis for identifying sales tax expenditures. Therefore, if an exemption specifically exists in the state statute, it is listed as a sales tax expenditure. This has the advantage of being a very straightforward and non-subjective rule to apply. As a second advantage, this method provides a comprehensive list of all statutory exemptions allowing for comparison between provisions affecting taxpayers and industries.

This rule has the disadvantage of identifying many sales tax provisions as tax expenditures that would not be identified as tax expenditures under the rule of good tax policy. This is particularly true in the case of business inputs. There are several business inputs, such as the exemption for energy used in manufacturing, that are listed in this report as tax expenditures but are not activities that would be included in the tax base if the base were defined using the best economic principles. When business inputs are included in the sales tax base, those inputs are taxed and the tax is included in the price when the input is sold to the next stage of production. The more these inputs are taxed at the intermediate stages of production, the more tax is embedded in the price of the final good. This embedded tax distorts prices and influences economic decisions. Therefore, it is important to understand that while some business exemptions are listed as tax expenditures in this report, policymakers may find it helpful to distinguish the business inputs from tax expenditures that are provided for more societal reasons, such as the tax exemption for public school lunches or for the sale of food for off-premises consumption. To aid policy makers, this

report identifies in the appendix the sales tax expenditure provisions that are considered business inputs.

Tax Expenditures vs. Revenue Estimates

The estimate associated with a tax expenditure provision does not necessarily represent the revenue that would be gained from the repeal of the enabling legislation. Instead, the cost of the tax expenditure represents the value of the deduction or credit taken via the particular provision by itself, without consideration of potential interactions with other provisions. Although the presence of one provision may interact with the use of another provision, tax expenditures are estimated as independent provisions. For instance, if the federal research and development tax credit were repealed, federal revenues would not increase by the amount of the federal tax expenditure estimate but by a smaller amount. This is because some of the research expenditures claimed through the federal tax credit would be shifted over to another tax deduction or credit so that the savings to the government would be less than the value of the tax expenditure estimate. In addition, tax expenditure estimates do not incorporate behavioral effects that may occur due to the elimination of a provision. For instance, the tax expenditure estimate associated with the deduction for charitable giving is based on a current level of charitable contributions. If the deduction for charitable contributions were proposed to be eliminated, the revenue effect presented in the fiscal note would incorporate both the initial value of charitable contributions from the tax expenditure estimate and a timing effect that would result from people speeding up their level of contributions in response to the future loss of the deduction. Thus, tax expenditure estimates can only act as a preliminary indication of the revenue effect that would occur if the provision were eliminated or modified.

Data Sources and Reliability of Estimates

To the extent possible, data from the Georgia Department of Revenue (DOR) is used to estimate the expenditures included in this report. Unfortunately, the required information is not always collected or available. When it is not, other data sources, such as information from the U.S. Census Bureau, the U.S. Bureau of Economic Analysis, or the U.S. Bureau of Labor Statistics, are used. Every effort is made to provide reliable, well supported estimates of the provisions. Because of the time lag in processing income tax returns, the most recent data available from the Georgia DOR was calendar year (CY) 2018. Therefore, even in cases in which the Georgia DOR data is used as the primary data source, the tax expenditure costs presented in this report are estimates.

Two subjective measures of reliability are provided in this report: the estimate reliability and the data reliability. The reliability of both the estimate and data are categorized into three classes: A, B, and C. Class A estimates and data sources are considered the most reliable. Data sources with a Class A status consist of data from the federal statistical agencies or from the Georgia DOR. Estimates with a Class A status are typically those estimates that are based on Class A data that

is particularly applicable to the expenditure provision. For instance, most of the state business tax credit expenditures are listed as Class A estimates. They are based on tax credit data provided by the Georgia DOR that specifically addresses or measures the tax expenditure provision. On the other hand, most sales tax estimates are given a Class B status. While these provisions may be based on Class A data sources, such as the Economic Census or the Consumer Expenditure Survey from the Bureau of Labor Statistics, the data may only be available at a national level, or the data may refer to more activities than is covered by the tax expenditure provision. In these cases, the data must be adjusted to represent the specific activity associated with the expenditure provision and scaled down to represent the value of the activity within Georgia. Class C estimates are believed to provide reasonable estimates and are based on the best data available. For some items, no reliable information is available. In these cases, no estimate for the expenditure is provided.

Class of Estimate/Class of Data	Description of Estimate Reliability	Examples of Data Sources by Reliability Status
Class A	Based on data specifically related to the tax expenditure provision and to Georgia taxpayers	Data from Department of Revenue, Bureau of Labor Statistics Consumer Expenditure Survey, Bureau of Economic Analysis, U.S. Census Bureau datasets
Class B	Based on national data which has been modified to represent Georgia and the specific tax activity covered by the expenditure	Industry surveys and trade magazines, most proprietary information
Class C	Represents best available estimate at this time	Newspaper articles, secondary sources

Local Government Effects

In addition to the state estimates, this report attempts, where possible, to estimate the effects on local government revenues. There are many state exemptions that have local ramifications, such as numerous exemptions from the sales tax base. The local estimates that are provided represent the aggregate value of the exemptions that would accrue to the counties, municipalities, school districts, and special service districts, including tax allocation and community improvement districts.

Consistency with prior estimates

The current report, prepared for FY 2022, presents estimates for FY 2020-FY 2022. The report for FY 2021 provided estimates for FY 2019-FY 2021. In most cases, the estimates between the current and past reports are consistent, with the latest report continuing the same trend in the value of the estimates that was established in earlier reports. On the other hand, there are some cases in which estimates presented in the FY 2022 report differ significantly from those presented in the past reports. This usually occurs because new information has become available or because a new forecast of economic activity is relied upon to predict future values. The updated estimates are included in the current report and any major inconsistency with prior reports is noted in the discussion relating to the expenditure.

Outline of the Report

The report continues with a summary table containing a title of each tax expenditure provision, the tax base it is associated with, the type of expenditure, and the estimated values for FY 2020-22 for all tax expenditures identified in the report. Provisions that are assigned a positive value denote an expenditure that is estimated to reduce state or local revenues. Provisions assigned a value of “(m)” denote a tax expenditure that is estimated to reduce state revenues by less than \$1 million. Provisions assigned a negative value denote a positive tax expenditure that is estimated to increase state revenues. Provisions assigned a value of “(-m)” denote a tax expenditure that is estimated to increase state revenues by less than \$1 million.

In addition to an identifying title, each expenditure provision is assigned an expenditure number, the first digit of which corresponds to the different sections of this report, such as 1 for the individual income tax and 5 for the insurance premium tax. The remaining portion of the numeric identifier is used to divide the expenditures into different subcategories such as federal and state expenditures, and deductions and credits. Only in the case of the sales tax exemptions does the expenditure number have any relationship to the state tax code section to which the expenditure item is associated. The numeric identifiers for each provision are consistent across tax expenditure reports and can be used to compare expenditure estimates from one report to the next.

Following the summary tables are detailed sections for each of the specific taxes covered in this report. These detailed sections begin with a brief description of the tax, latest figures on revenue collection and any information on recent modifications to the base. These detailed sections also include additional information for each of the expenditure items such as the statute number, the year in which the expenditure provision was enacted and the year in which it became effective, information on the data and estimate reliability and data source, a more detailed description of the tax expenditure provision, and the value of the expenditure provision. The report concludes with an appendix that includes tables listing recently expired provisions, sales and use tax expenditures by type, and distributional analysis for a selected number of income tax provisions.

Summary of State Tax Expenditures

Expenditure	Summary	Tax	Type of Expenditure	State FY 2020	State FY 2021	State FY 2022
				<i>(in Millions)</i>		
Federal Income Tax Provisions¹						
1.1.001	Exclusion of employee meals and lodging	Federal Individual Income Tax	Exclusion	20	21	22
1.1.002	Exclusion of housing allowances for ministers	Federal Individual Income Tax	Exclusion	5	5	6
1.1.003	Exclusion of employer-provided child care	Federal Individual Income Tax	Exclusion	16	16	16

Special Excise Tax on Consumer Fireworks

State Hotel-Motel Tax

1. Individual Income Tax

The individual income tax was first levied in Georgia in 1929 at a rate equal to one-third the federal rate of income taxation. The rate structure effective January 1, 2019 includes six brackets ranging from 1 percent to 5.75 percent, prior to which the rate structure had a top rate of 6 percent and had remained unchanged since 1955 when the 7 percent rate on taxable incomes over \$20,000 was eliminated. The threshold for each bracket depends on the filing status of the taxpayer, i.e. single, head of household, and married filing separate or joint.

The initial base of the Georgia individual income tax is the taxpayer's federal adjusted gross income (AGI). Several adjustments are made to this starting point to arrive at the version of AGI adopted by Georgia. After computing the Georgia version of AGI, taxpayers deduct an amount representing either the value of their Georgia itemized deductions or the Georgia standard deduction, the latter of which was increased effective January 1, 2018 from \$3,000 to \$6,000 for married filers and from \$2,300 to \$4,600 for single and head of household filers. In addition, for tax year 2012 and before, filers were allowed a personal exemption of \$5,400 for joint filers, \$2,700 for other filers, and \$3,000 for each dependent. For tax years after 2012, the personal exemption for married filers was increased to \$7,400 for joint filers and \$3,700 each if filing separately.

The tax is administered by the Georgia DOR. Individual income tax collections equaled \$12.2 billion in FY 2019 and accounted for 51.2 percent of Georgia's revenues from taxation. In CY 2019, 4.98 million individual state returns were processed. While predominately paid by individuals, a significant number of business entities are organized so that income associated with these enterprises is reported through the individual income tax. All revenue collected from the individual income tax is deposited in the State General Fund.

It is important to keep in mind that tax expenditure estimates may differ from revenue estimates presented in fiscal notes. Estimates included in fiscal notes incorporate behavioral effects that are not considered when estimating tax expenditure provisions. The purpose of a tax expenditure estimate is to convey the cost that would be necessary if the item were offered as a direct budgetary expenditure instead of a reduction in the tax liability. A second caveat concerns the estimates associated with the state individual income tax credit provisions. Forecasting the value of the revenue loss stemming from the use of these credits is problematic because of the presence of extensive carryforwards in the case of some credits. Because of past credit carryforwards, taxpayers may claim credits on current or future year tax returns that were created in prior years. In some cases, the credit may have expired such that taxpayers are no longer able to create new credits, but the revenue loss to the state continues for several years until all carryforward liabilities have been exhausted. Therefore, the estimates provided in this report should be interpreted as the expected revenue loss stemming from the use of currently created or previously created credits and not an estimate of the value of credits created in a given year.

The Tax Expenditure Report includes the expenditures associated with both state and federal tax provisions. Because the Georgia individual income tax is based on the federal system, expenditures that are present at the federal level have revenue implications at the state level. For example, changes to itemized deductions by the federal government have repercussions on state tax revenues. The value of the expenditure as it relates to state taxes paid by those filing a Georgia return is presented in section 1.1 on federal exclusions. In some cases, Georgia might not adopt a federal provision. In that case, the expenditure is not listed because there is no loss of revenue to the state. In general, the value of the federal tax expenditure to the state of Georgia is determined by allocating a portion of the federal tax base associated with the expenditure estimate as estimated by the Joint Committee on Taxation for the U.S. Congress. The data and estimate reliability for the conformity provisions are considered class A. In some cases, however, the values of the Georgia estimates are highly sensitive to the assumptions made concerning the appropriate tax rate for a given expenditure provision and the allocation factor that is used to determine the amount of federal activity associated with Georgia. The estimates associated with the federal conformity provisions are based on current law as it existed on September 30, 2019; any changes to provisions that may occur because of federal legislative action after that date are not reflected in the estimates.

The explanations of the federal conformity provisions are taken from *Tax Expenditures: Compendium of Background Material on Individual Provisions*, prepared by the Congressional Research Service for the U.S. Senate Committee on the Budget, December 2018.

1.1 Federal Exclusions

1.1.001 Exclusion of employee meals and lodging

Federal Statute IRC section 119 and 132(e)(2)

Description: Employees are allowed to exclude the fair market value of meals and lodging furnished by employers if provided on the employer's premises for the convenience of the employer.

	State Fiscal Years (\$ in Millions)		
	<u>2020</u>	<u>2021</u>	<u>2022</u>
State Tax Expenditure	20	21	22

(m) Denotes a value of less than \$1 million

1.1.002 Exclusion of housing allowances for ministers

Federal Statute IRC Section 107 and 265

Description: In general, this provision allows ministers to deduct certain housing related expenditures from their gross income.

1.3.010

Qualified Opportunity Zones

Federal Statute PL 115-97; IRS 1400Z-1

Description: The inclusion in gross income of capital gains reinvested in a qualified opportunity fund may be temporarily deferred and 15 percent of capital gains reinvested may be excluded if the investment is held for seven years. Capital gains from the sale or exchange of an investment in the qualified opportunity fund held for at least 10 years are excluded from gross income. A qualified

opportunity fund is an investment vehicle organized as a corporation or a partnership for the purpose of investing in qualified opportunity zone property that holds at least 90 percent of its assets in qualified opportunity zone property. Qualified opportunity zone property includes any qualified opportunity zone stock, any qualified opportunity zone partnership interest, and any qualified opportunity zone business property. Certain low-income community population census tracts may be designated as qualified opportunity zones by the chief executive officer of the State (which includes the District of Columbia).

1.6.012 Georgia Job Tax Credit

Statute	§48-7-40 and §48-7-40.1
Year Enacted	§48-7-40: 1989; §48-7-40.1: 1993
Year Effective	§48-7-40: Taxable years beginning on or after January 1, 1990; §48-7-40.1: Taxable years beginning on or after January 1, 1994
Data Source	DOR data as of 2018 and Office of Insurance and Safety Fire Commissioner
Estimate Reliability	Class A
Data Reliability	Class A
Note	The same estimate is provided in the corporate income tax and insurance premium tax sections, see 2.6.001 and 5.00200. In 2018, the qualifying areas were expanded to include counties with military bases and industrial parks that are owned and operated by a government entity.

Description: The credit provides a statewide job tax credit to any business or headquarters engaged in manufacturing, warehousing and distribution, processing, telecommunications, broadcasting, tourism, or research and development. Retail establishments are only allowed the credit if located in one of the 40 least-developed counties of the state. Average wages must be greater than the average wage of the county in the state with the lowest

must also create at a minimum 1,800 new jobs within a six-year period and can receive credit for up to a maximum of 4,500 jobs. For business enterprises that first qualify in a taxable year beginning on or after January 1, 2009, the business enterprise must meet the job creation requirement of 1,800 eligible full-time employees and either the qualified investment requirement of \$450 million in qualified investment property, or the payroll requirement of \$150 million in total annual Georgia W-2 reported payroll within the six-year period.

1.6.020 Film Tax Credit

Statute	§48-7-40.26
Year Enacted	2005
Year Effective	Taxable years beginning on or after January 1, 2005
Data Source	DOR data for TY 2018
Estimate Reliability	Class A
Data Reliability	Class A
Note	The same estimate is provided in the corporate income tax section, see 2.6.009. Tax credit provisions applicable to qualified interactive entertainment production companies were modified in 2015.

Description: Production companies which have at least \$500,000 of qualified expenditures in a state-certified production may claim this credit. Certification must be approved through the Georgia Department of Economic Development. There are special provisions relating to the tax credits awarded to interactive entertainment companies. Under the 2017 modifications to this statute, the 2019 sunset for the qualified interactive entertainment production company tax credit has been eliminated.

Estimate Reliability	Class A
Data Reliability	Class A
Note	The same estimate is provided in the corporate income tax, see section 2.6.040.

Description: Provides for a credit for casualty losses incurred on commercial timberland due to damage attributed to Hurricane Michael in the fall of 2018, subject to replanting requirements as described below. The amount of the credit is equal to 100 percent of the casualty loss deduction reported on the taxpayer’s federal return, provided that the credit amount does not exceed \$400 per acre. Taxpayers must seek preapproval for the credit on or before December 31, 2019. Taxpayers are eligible to claim the credit in the taxable year in which the taxpayer replants 90 percent of the timber lost in the hurricane. All tax credits must be claimed by December 31, 2024. Credits can be sold once prior to January 1, 2024. Credits claimed are nonrefundable, but can be carried forward for up to 10 years. The total amount of credits preapproved may not exceed \$200 million.

Year Enacted	2017
Year Effective	2018
Data Source	Fiscal Note for HB 199 for 2017
Estimate Reliability	Class A
Data Reliability	NA

Note

Description: Postproduction companies with at least \$500,000 in qualified postproduction expenditures per year will be eligible for a credit equal to 20 percent of the qualified postproduction expenditures. An additional 10 percent credit is allowed if the qualified production expenditures were incurred in the state. An additional 5 percent credit is allowed if the qualified production expenditures were incurred in a tier 1 or tier 2 county. The value of credits awarded is limited to a maximum of \$10 million for 2018 through 2022. If in any year the aggregate amount of credits allowable is not awarded, the remaining credits will be rolled in the allowable credits for the following year. Postproduction companies with expenditures between \$100,000 and \$500,000 per year are eligible for a separate credit equal to 20 percent of the qualified postproduction expenditures. Aggregate annual claims on this credit are limited to \$1 million. The \$1 million small company credit limit does not count against the credit limit for the large company credit discussed above. No credits shall be earned in years after 2022.

Expenditure	Statute	Summary
1.6.015	§48-7-40.25	New Manufacturing Facilities Property Credit

2. Corporate Income Tax

The corporate income tax was first levied in Georgia in 1929. While originally levied at a rate equal to one-third of the federal corporate tax rate, the rate was changed to 4 percent in 1931. The tax has gone through several rate changes since its introduction, including in 1949 when it was temporarily increased to 7.5 percent. The rate was 6 percent from 1969 through 2018, but was reduced to 5.75 percent effective for tax years beginning on or after January 1, 2019. The Georgia corporate income tax is a flat rate tax, with a single rate applying to all Georgia taxable income of the corporation.

The starting point for the construction of the tax base is federal taxable income of a corporation. Several adjustments are made in order to determine Georgia business income. For example, although corporations are allowed certain special depreciation deductions at the federal level, some of these deductions are not allowed at the state level. Firms taking these deductions on their federal return must add these deductions back to their tax base when determining their state taxable income. In addition, firms operating in multiple states must apportion their corporate income to each of the states in which they have a legal obligation to pay the tax. Since 2008, firms with multistate income determine the portion of their total income associated with Georgia by computing their total Georgia receipts relative to their total receipts. Prior to 2008, Georgia firms were required to use a three-factor apportionment formula.

It is important to keep in mind that tax expenditure estimates may differ from revenue estimates presented in fiscal notes. Estimates included in fiscal notes incorporate behavioral effects that are not considered when estimating tax expenditure provisions. The purpose of a tax expenditure estimate is to convey the cost that would be necessary if the item were offered as a direct budgetary expenditure instead of a reduction in the tax liability. A second caveat concerns the estimates associated with the state corporate credit provisions. Forecasting the value of the revenue loss stemming from the use of these credits is problematic due to the presence of extensive carry forwards in the case of some credits. Because of past credit carry forwards, firms may claim credits on current or future year tax returns that were created in prior years. In some cases, the credit may have expired such that taxpayers are no longer able to create new credits, but the revenue loss to the state continues for several years until all carryforward liabilities have been exhausted. Therefore, the estimates provided in this report should be interpreted as the expected revenue loss stemming from the use of currently created or previously created credits and not an estimate of the value of credits created in a given year.

The tax is administered by the Georgia DOR. Corporate tax collections for FY 2019 were \$1.2 billion or 5.0 percent of total state tax revenues. Approximately 359 thousand corporate returns were processed in CY 2019. All revenue collected from this tax is deposited into the State General Fund.

2.1 Federal Corporate Exclusions

2.1.001 Permanent exemption from imputed interest rules

Federal Statute IRC Sections 163(e), 483, 1274, and 1274(A)

Description: Debt instruments for amounts not exceeding an inflation adjusted maximum, given in exchange for real property, may not have imputed to them an interest rate greater than 9 percent.

	State Fiscal Years (\$ in Millions)

2.2.019 Deduction for foreign-derived intangible income

Federal Statute P.L. 115-97, Sec. 250(a)

Description: A domestic corporation is allowed a deduction equal to 50 percent of foreign-derived intangible income until 2025 and 37.5 percent thereafter.

State Fiscal Years (\$ in Millions)

	<u>2020</u>	<u>2021</u>	<u>2022</u>
State Tax Expenditure	27	53	63

(m) Denotes a value of less than \$1 million

2.2.020 Limitation on deduction of FDIC premium

Federal Statute Pub. L. No. 115-97

Description: The deduction for the applicable percentage of any Federal Deposit Insurance Corporation (“FDIC”) premium paid or incurred by the taxpayer is disallowed. For taxpayers with total consolidated assets of \$50 billion or more, the applicable percentage is 100 percent. Otherwise, the applicable percentage is the ratio of the excess of total consolidated assets (as of the close of the taxable year) over \$10 billion to \$40 billion. The provision does not apply to taxpayers with total consolidated assets (as of the close of the taxable year) that do not exceed \$10 billion.

	State Fiscal Years (\$ in Millions)		
	<u>2020</u>	<u>2021</u>	<u>2022</u>
State Tax Expenditure	-5	-5	-5

(m) Denotes a value of less than \$1 million

2.2.021 Limitation on NOL deduction

Federal Statute Pub. L. No. 115-63

Description: The deduction for net operating losses is limited to 80 percent of taxable income.

	State Fiscal Years (\$ in Millions)		
	<u>2020</u>	<u>2021</u>	<u>2022</u>
State Tax Expenditure	-3	-3	-3

(m) Denotes a value of less than \$1 million

2.3 Special Federal Corporate Conformity Provisions

2.3.001 Deferral of gain on like-kind exchanges

Federal Statute IRC Section 1031

Description: When business or investment property is exchanged for property of a like kind no gain or loss is recognized on the exchange and therefore no tax is paid at the time of the exchange.

	State Fiscal Years (\$ in Millions)		
	<u>2020</u>	<u>2021</u>	<u>2022</u>
State Tax Expenditure	7	8	8

(m) Denotes a value of less than \$1 million

2.3.002 Special rules for magazine, paperback book, and record returns

Federal Statute IRC Section 458

Description: Publishers and distributors of magazines, paperbacks, and records may elect to exclude from gross income for a tax year, the income from the sale of goods that are returned after the close of the tax year.

	State Fiscal Years (\$ in Millions)		
	<u>2020</u>	<u>2021</u>	<u>2022</u>
State Tax Expenditure	(m)	(m)	(m)

(m) Denotes a value of less than \$1 million

2.3.003 Two-year carryback for net operating losses attributable to farming

Federal Statute IRC Section 172

Description: Current law provides a two-year carryback period for losses related to farming. The normal carryback period for losses is two years.

	State Fiscal Years (\$ in Millions)		
	<u>2020</u>	<u>2021</u>	<u>2022</u>
State Tax Expenditure	(m)	(m)	(m)

(m) Denotes a value of less than \$1 million

2.3.004 Special rules for mining reclamation reserves

Federal Statute IRC Section 468 and 1274

Description: Electing taxpayers may deduct the current value equivalent of certain estimated future reclamation and closing costs for mining and solid waste disposal sites.

	State Fiscal Years (\$ in Millions)		
	<u>2020</u>	<u>2021</u>	<u>2022</u>
State Tax Expenditure	(m)	(m)	(m)

(m) Denotes a value of less than \$1 million

2.3.005 Cash accounting, for certain businesses

Federal Statute IRC Sections 446 and 448

Description: The cash method of accounting may be used by any business taxpayer that is not a tax shelter and falls into at least one of three specified categories. These are farming businesses, qualified personal service corporations, and entities that meet a gross receipts test.

	State Fiscal Years (\$ in Millions)		
	<u>2020</u>	<u>2021</u>	<u>2022</u>
State Tax Expenditure	3	2	2

(m) Denotes a value of less than \$1 million

2.3.006 Deferral of gain on non-dealer installment sales

Federal Statute IRC Sections 453 and 453A(b)

Description: Some taxpayers are allowed to report some sales using the installment method of accounting in which the gross profit from the sale is prorated over the years during which the payments are received.

	State Fiscal Years (\$ in Millions)		
	<u>2020</u>	<u>2021</u>	<u>2022</u>
State Tax Expenditure	10	10	10

(m) Denotes a value of less than \$1 million

2.3.007 Completed contract rules

Federal Statute IRC Section 460

Description: Some taxpayers with construction or manufacturing contracts extending for more than one tax year are allowed to report some or all of the profit on the contracts under special accounting rules rather than the normal rules of tax accounting.

	State Fiscal Years (\$ in Millions)		
	<u>2020</u>	<u>2021</u>	<u>2022</u>
State Tax Expenditure	3	2	2

(m) Denotes a value of less than \$1 million

2.3.008 Special treatment of employee stock ownership plans (ESOPs) (includes deferral of tax on certain employee stock plans)

Federal Statute IRC Sections 401(a)(28), 404(a)(9), 404(k), 415(c)(6), 512(e), 1042, 497(e)(7), 4975(d)(3), 4978, 4979A

Description: ESOPs are provided special tax treatment. Employer contributions may be deducted as a business expense. In addition, some contributions are subject to less restrictive limits than contributions to other employee benefit plans. Tax on qualified employee stock purchase plans are not taxed when granted or excised. Tax is deferred until stock is sold.

	State Fiscal Years (\$ in Millions)		
	<u>2020</u>	<u>2021</u>	<u>2022</u>
State Tax Expenditure	(-m)	(-m)	(-m)

(m) Denotes a value of less than \$1 million

2.3.009 Deferral of capital construction costs of shipping companies

Federal Statute IRC Section 7518

Description: U.S. operators of vessels in foreign, or domestic commerce of the U.S., or in U.S. fisheries, may establish a capital construction fund into which they may make certain tax deductible deposits. In addition, the earnings on the deposits are tax deferred.

	State Fiscal Years (\$ in Millions)		
	<u>2020</u>	<u>2021</u>	<u>2022</u>
State Tax Expenditure	(m)	(m)	(m)

(m) Denotes a value of less than \$1 million

2.3.010 Qualified Opportunity Zones

Federal Statute PL 115-97; IRS 1400Z-1

Description: A qualified opportunity fund is an investment vehicle organized as a corporation or a partnership for the purpose of investing in qualified opportunity zone property that holds at least 90 percent of its assets in qualified opportunity zone property. Qualified opportunity zone property

includes any qualified opportunity zone stock, any qualified opportunity zone partnership interest, and any qualified opportunity zone business property. Certain low-income community population census tracts may be designated as qualified opportunity zones by the chief executive officer of the State (which includes the District of Columbia).

State Fiscal Years (\$ in Millions)

	<u>2020</u>	<u>2021</u>	<u>2022</u>
State Tax Expenditure	9	9	8

(m) Denotes a value of less than \$1 million

2.4 Corporate Apportionment

Discussed below are three issues relating to corporate apportionment that can be considered tax expenditures because they are deviations from the traditional formula of corporate apportionment and result in a benefit to some taxpayers. No estimate of the value of these expenditures is available at this time.

2.4.001 Single-Factor Apportionment

Corporate income earned in Georgia is apportioned using a single-factor apportionment formula. With single-factor apportionment, firms determine state tax liability based solely on the ratio of Georgia receipts to total receipts. The traditional apportionment formula involves the use of three Georgia-total ratios: property, payroll, and receipts. With the three-factor formula, the firm applies a weight of 33.33 percent to each ratio. The single-factor formula benefits firms that have manufacturing presence in one state but significant sales outside of the state. Firms that are located and operate in a single state are not affected by the apportionment formula.

2.4.002 Throwback Rule

Under a throwback rule, out-of-state sales from a corporation are taxed by the state of origin if the corporation has no nexus in the destination state. At least 25 states have a throwback rule. Georgia, North Carolina, Florida, Tennessee, South Carolina, and Virginia do not, but Alabama does. An alternative rule is the “throw-out rule,” which eliminates sales to non-nexus states from both the numerator and denominator of the apportionment formula of a corporation. Georgia does not have a throw-out rule.

2.4.003 Corporate Receipts Sourcing

Georgia is among 16 states that apportions multistate corporate income based only on gross receipts, (i.e. a 100-percent sales factor). This creates a destination-based corporate income tax system. Under this approach, corporations pay taxes based on the state in which their products are sold, not where production takes place. This rule applies to the sale of tangible property. When considering apportionment for services provided across state lines, Georgia employs a market-based sourcing rule. At the present, there is no consensus between the states on how to define a “market” for the purpose of implementing this rule but, in general, it means that services will be taxed based on the state in which the customer receives the benefit. The rule is meant to apply a consistent destination-based treatment to services when compared to tangible goods.

**Corporate apportionment expenditures for which an estimate is not
currently available**

Expenditure	Statute	Summary
2.4.001	N/A	Single-factor Apportionment
2.4.002	N/A	Throwback Rule
2.4.003	N/A	Corporate Receipts Sourcing

2.5 Georgia Deductions

2.5.003 Exclusion of global intangible low-taxed income (GILTI)

Statute	§48-7-21
Year Enacted	2018
Year Effective	2018
Data Source	Joint Committee on Taxation and the Bureau of Labor Statistics
Estimate Reliability	Class B
Data Reliability	Class B
Note	

Description: Global intangible low-taxed income is defined for the purpose of Federal taxation in Section 951A of the Internal Revenue Code of 1986 as excess returns realized by U.S. shareholders from controlled foreign corporations in low-tax areas outside of the United States. GILTI is includable in federal taxable income net of a 50 percent deduction in tax years 2018-25 and a 37.5 percent deduction thereafter. Georgia does not tax any portion of GILTI.

2.6 Georgia Credits

2.6.001 Georgia Job Tax Credit

Statute	§48-7-40 and §48-7-40.1
Year Enacted	§48-7-40: 1989; §48-7-40.1: 1993
Year Effective	§48-7-40: Taxable years beginning on or after January 1, 1990; §48-7-40.1: Taxable years beginning on or after January 1, 1994.
Data Source	DOR data as of 2018 and Office of Insurance and Safety Fire Commissioner
Estimate Reliability	Class A
Data Reliability	Class A
Note	The same estimate is provided in the personal income tax and insurance premium tax sections, see 1.6.012 and 5.00200. In 2018, the qualifying areas were expanded to include counties with military bases and industrial parks that are owned and operated by a government entity.

Description: The credit provides a statewide job tax credit to any business or headquarters engaged in manufacturing, warehousing and distribution, processing, telecommunications, broadcasting, tourism, or research and development. Retail establishments are only allowed the credit if located in one of the 40 least-developed counties of the state. Average wages must be greater than the average wage of the county in the state with the lowest average wage. To be eligible, employers must offer health insurance to all new employees. It also provides a tax credit for business enterprises designated as operating in less-developed areas. These include areas with ten or more contiguous census tracts with higher than 15 percent poverty and counties with both a military base and a government owned and operated industrial park.

2.6.007

Port Activity Tax Credit

Statute	§48-7-40.15
Year Enacted	1998
Year Effective	Latest modifications apply to taxable years beginning on or after January 1, 2010
Data Source	DOR data as of TY 2018
Estimate Reliability	Class A
Data Reliability	Class A
Note	Estimate combined with 2.6.008. The same estimate is provided in the income tax section, see 1.6.018.

Description: For taxable years beginning before January 1, 2010, businesses or the headquarters of any such businesses engaged in manufacturing, warehousing and distribution, processing, telecommunications, broadcasting, tourism, or research and development that have increased shipments out of Georgia ports during the previous 12-month period by more than 10 percent over their 1997 base year port traffic, or by more than 10 percent over 75 net tons, five containers or 10 20-foot equivalent units (TEU's) during the previous 12-month period are qualified for increased job tax credits or investment tax credits. For taxable years beginning on or after January 1, 2010, the increase is based on a

comparison of the previous 12-month period to the second preceding 12-month period.

2.6.022 Clean Energy Property and Wood Residuals Credit

Statute	§48-7-29.14
Year Enacted	2008
Year Effective	July 1, 2008
Data Source	DOR data as of TY 2018
Estimate Reliability	Class A
Data Reliability	Class A
Note	The same estimate is provided in the income tax section, see 1.6.033.

Description: The Georgia Clean Energy Property and Wood Residuals tax credit includes two general types of income tax credits: 1) investments in the construction, purchase or lease of clean energy property, and 2) the value of wood residuals delivered to a qualified renewable biomass facility. The clean energy property tax credits apply to solar, wind and energy efficiency projects, geothermal heat pumps, and certain biomass equipment for making electricity. The clean energy property tax credit expired on December 31, 2014. For the purposes of the Wood Residuals tax credit, wood residuals include urban wood waste, land clearing residues, and pellets, but not wood from a U.S. national forest.

2.6.040 Reforestation credit for losses incurred on commercial timberland due to hurricane damage

Statute	§48-7-40.36
Year Enacted	2018
Year Effective	2018
Data Source	Fiscal Note for HB 4EX LC 43 1048S for 2018 Special Session
Estimate Reliability	Class A
Data Reliability	Class A
Note	The same estimate is provided in the personal income tax see, section 1.6.051.

Description: Provides for a credit for casualty losses incurred on commercial timberland due to damage attributed to Hurricane Michael in the fall of 2018, subject to replanting requirements as described below. The amount of the credit is equal to 100 percent of the casualty loss deduction reported on the taxpayer’s federal return, provided that the credit amount does not exceed \$400 per acre. Taxpayers must seek preapproval for the credit on or before December 31, 2019. Taxpayers are eligible to claim the credit in the taxable year in which the taxpayer replants 90 percent of the timber lost in the hurricane. All tax credits must be claimed by December 31, 2024. Credits can be sold once prior to January 1, 2024. Credits claimed are nonrefundable, but can be carried forward for up to 10 years. The total amount of credits preapproved may not exceed \$200 million.

2.6.041 Qualified Post-Production Expenditures Credits

Statute	48-7-40.26A
Year Enacted	2017
Year Effective	2018
Data Source	Fiscal Note for HB 199 for 2017
Estimate Reliability	Class A
Data Reliability	NA
Note	The same estimate is provided in the personal income tax see, section 1.6.052.

Description: Postproduction companies with at least \$500,000 in qualified postproduction expenditures per year will be eligible for a credit equal to 20 percent of the qualified postproduction expenditures. An additional 10 percent credit is allowed if the qualified production expenditures were incurred in the state. An additional 5 percent credit is allowed if the qualified production expenditures were incurred in a tier 1 or tier 2 county. The value of credits awarded is limited to a maximum of \$10 million for 2018 through 2022. If in any year the aggregate amount of credits allowable is not awarded, the remaining credits will be rolled in the allowable credits for the following year. Postproduction companies with expenditures between \$100,000 and \$500,000 per year are eligible for a separate credit equal to 20 percent of the qualified postproduction expenditures. Aggregate annual claims

on this credit are limited to \$1 million. The \$1 million small company credit limit does not count against the credit limit for the large company credit discussed above. No credits shall be earned in years after 2022.

Expenditure	Statute	Summary
2.6.004	§48-7-40.25	New Manufacturing Facilities Property Credit

3. Corporate Net Worth Tax

Georgia imposes a tax on the net worth of corporations doing business or owning property in the state. The net worth of foreign corporations subject to the Georgia tax is based upon the ratio of assets in Georgia and gross receipts in Georgia to total assets and gross receipts. The tax is graduated based upon the taxable net worth of the corporation.

The tax is administered by the Georgia DOR. Revenues from this tax totaled \$49.7 million in FY 2019. All revenues from this tax are deposited into the State General Fund.

3.003 Exemption for corporations with net worth of \$100,000 or less

Statute	§48-13-71
Year Enacted	2017
Year Effective	Tax years beginning on or after January 1, 2018
Data Source	Fiscal Note SB 133/LC 40 1296 for 2017

3.002	§48-13-72	Exemption for insurance companies separately taxed

4. Sales and Use Tax

The sales and use tax was first enacted in Georgia in 1951 at a rate of 3 percent. The rate was increased to its current rate of 4 percent in 1989. The sales tax base consists of retail sales, leases, rentals, use or consumption of tangible personal property. In addition to the state sales tax, local governments are authorized to impose an assortment of local option sales taxes. In most counties, the local sales taxes imposed consist of a combination of a Local Option Sales Tax (LOST), Special Purpose Local Option Sales Tax (SPLOST) and/or an Educational Special Purpose Local Option Sales Tax (E-SPLOST) with tax rates of 1 percent for each. A total of 94 counties plus the city of Atlanta have also implemented a sales tax dedicated to transportation purposes (T-SPLOST) as of October 2020, with tax rates of 1 percent except for Atlanta and Fulton County outside of Atlanta where the T-SPLOST rates are 1.4 and 0.75 percent respectively. In addition, Atlanta levies another 1 percent sales tax to cover expenses related to sewer repairs, two counties levy a 1 percent Homestead Option Sales Tax (HOST), and three counties and the city of Atlanta levy sales taxes dedicated to funding the Metropolitan Atlanta Rapid Transit Authority (MARTA), with rates of 1 percent except in Atlanta where the rate is 1.5 percent.

In general, the local tax base is consistent with the state sales tax base, which is defined to include mainly tangible personal property. The major exception is food for home consumption, which is included in the local sales tax base, but is exempted from the state tax. Services, with a few exceptions, are generally excluded from both the state and the local tax base. This report provides estimates of some services that are implicitly exempt from the sales tax by virtue of not being tangible personal property. Lastly, this report categorizes each sales tax expenditure by type to allow the reader to distinguish between tax expenditures, such as those for business inputs, that are provided for reasons of reducing economic distortions from those provided on the basis of more societal reasons.

The tax is administered by the Georgia DOR. The sales tax is remitted to the Georgia DOR by the retailer and the use tax is remitted by the consumer in cases where the retailer does not collect and remit sales tax. In FY 2019, the state sales and use tax generated \$6.25 billion in state revenues and accounted for approximately 26.3 percent of total state tax revenues. All proceeds from the state sales and use tax, net of vendor compensation, are deposited into the State General Fund.

5. Insurance Premium Tax

The premium tax is imposed upon gross direct premiums received by insurers doing business in the state to insure persons, property, or risks in Georgia. The state tax rate is imposed at a rate of 2.25 percent of gross direct premiums, though the rate is reduced to 1.25 percent for insurers holding at least 25 percent of their total assets, exclusive of direct obligations of the United States, in specified classes of Georgia assets. For insurers holding 75 percent of such total assets in Georgia, the rate is reduced further to 0.5 percent.

Counties levy a tax at 1 percent on gross direct premiums of life insurance companies for policies covering persons residing in unincorporated areas of the county, except that the county tax shall not apply to life insurers that qualify for the abatement of the state tax for firms with 75 percent Georgia assets. Municipalities may levy a tax of up to 1 percent on life policies covering persons residing in the given municipality. Counties and municipalities may levy rates of up to 2.5 percent on gross direct premiums for policies other than life insurance policies.

This tax is administered by the State Insurance Commissioner. In FY 2019, state revenues from this tax equaled \$511 million and local revenues equaled \$655 million. The state proceeds from the tax are deposited into the State General Fund.

5.00100 Deduction of retaliatory taxes paid to other states

Statute	§33-8-4.1; §33-1-18; §48-7-29.6
Year Enacted	1960
Year Effective	2000
Data Source	DOR data as of 2018 and Office of Insurance and Safety Fire Commissioner
Estimate Reliability	Class A
Data Reliability	Class A
Note	The same estimate is provided in the corporate and personal Income tax sections, see 1.6.012 and 2.6.001. In 2018, the qualifying areas were expanded to include counties with military bases and industrial parks that are owned and

operated by a government entity.

Description: The credit provides a statewide job tax credit to any business or headquarters engaged in manufacturing, warehousing and distribution, processing, telecommunications, broadcasting, tourism, or research and development. Retail establishments are only allowed the credit if located in one of the 40 least-developed counties of the state. Average wages must be greater than the average wage of the county in the state with the lowest average wage. To be eligible, employers must offer health insurance to all new employees. It also provides a tax credit for business enterprises designated as operating in less-developed areas. These include areas with ten or more contiguous census tracts with higher than 15 percent poverty and counties with both a military base and a government owned and operated industrial park..

6. Motor Fuel Tax

The tax on motor fuels was substantially modified in 2015. Under the new law, the state tax on motor fuels other than diesel fuel and aviation gasoline is, as of January 1, 2020, 27.9 cents per gallon. The state tax on diesel fuel is 31.3 cents per gallon and the tax on aviation gasoline is 1 cent per gallon. Tax rates are adjusted annually for inflation and for the change in average fuel economy of new vehicles registered in the state in the prior year from the year before. The base of the motor fuel tax is imposed on any source of energy that can be used for propulsion of a motor vehicle on the public highways, including, but not limited to gasoline, fuel oils, compressed petroleum gas, and special fuels.

The tax is administered by the Georgia DOR and revenues generated from this tax are allocated by the state constitution to the Georgia Department of Transportation for highway purposes. State motor fuel tax revenues for FY 2019 totaled \$1.84 billion.

7. Alcoholic Beverage Tax

This state and local tax is imposed on alcoholic beverages including malt beverages, wine, and distilled spirits. Malt beverages sold in bulk containers (tap or draft beer) are taxed at a state rate of \$10 per container up to 31 gallons with a proportionate tax on fractional parts of 31 gallons for larger containers. For bottled and canned malt beverages, the state tax rate is 4 ½ cents per 12 ounces and proportionate rates on fractional parts of 12 ounces for other sizes. Table wines are taxed at a state rate of 11 cents per liter and an additional state import tax of 29 cents per liter is imposed on table wines produced outside of Georgia and imported into the state, in both cases with proportionate rates for fractional parts of a liter. A state excise tax of 27 cents per liter and an additional state import tax of 40 cents per liter is imposed on dessert wines, with proportionate rates for fractional parts of a liter. A state excise tax of 50 cents per liter is imposed on distilled spirits while alcohol (defined to mean ethyl alcohol greater than 190 proof intended for use as a beverage, including grain alcohol and spirits of wine) is subject to a state tax of 70 cents per liter, in both cases with the tax applied proportionately on fractions of a liter. Distilled spirits and alcohol imported to Georgia from outside the state are also subject to an additional state import tax of 50 cents and 70 cents per liter, respectively.

A uniform local government beer tax is levied at 5 cents per 12 ounces for bottled and canned malt beverages with proportionate rates for sizes other than 12 ounces. The rate for bulk (tap or draft) malt beverages is \$6 per container for containers up to 15 ½ gallons with proportionate rates for larger containers. Counties and municipalities may levy excise tax on wine at rates that do not exceed 22 cents per liter. Counties and municipalities may levy excise taxes on distilled spirits sold by the package at rates that do not exceed 22 cents per liter or proportionate rates for other size containers. Counties and municipalities may also levy excise taxes at rates up to 3 percent of the price charged for mixed drinks.

The state portion of the tax is administered by the Georgia DOR. Proceeds from the state tax are deposited into the State General Fund. In FY 2019, state collections equaled \$199 million. Local collections for FY 2017³ equaled \$147 million.

8. Tobacco Products Excise Tax

This tax is levied upon the sale, receipt, purchase, possession, consumption, handling, distribution, or use of tobacco, cigars, and cigarettes in Georgia. The tax is imposed at a rate of 37 cents per pack of 20 cigarettes and a like rate, pro rata, for other sized packages. Little cigars, weighing not more than three pounds per thousand are taxed at a rate of 2.5 mills each (\$2.50 per 1000). All other cigars are taxed at 23 percent of the wholesale cost price, exclusive of any trade, cash, of other discounts or any promotion, advertising, display or other similar allowances. Loose or smokeless tobacco is taxed at a rate of 10 percent of the wholesale cost price.

Under legislation enacted in 2020, excise taxes are also levied on consumable vapor products beginning January 1, 2021. The tax is imposed at a rate of 5 cents per fluid milliliter for consumable vapor products in a closed system and 7 percent of the wholesale cost price for other consumable vapor products and devices.

The tax is administered by the Georgia DOR. In FY 2019, the tax totaled \$223 million. The proceeds of the tax are deposited into the State General Fund.

9. Financial Institutions Special State Occupation Tax

This is a special state occupation tax imposed on the adjusted gross receipts of each depository financial institution that does business or owns property in the state. The state tax rate is levied at a rate of 0.25 percent. In addition to the state tax, counties and municipalities may levy a rate not to exceed 0.25 percent of gross receipts. Any amount paid under the special state occupation tax by a financial institution reduces the institution’s state income tax liability by an equal amount.

The tax is administered by the Georgia DOR. The revenues from this tax in FY 2019 equaled \$29 million. The proceeds of the tax are deposited into the State General Fund.

10. Special Assessment of Forest Land Conservation Use Property

Real property devoted to qualified conservation use is assessed at 40 percent of its current use value. This tax treatment is designed to reduce the property tax burden on landowners in an effort to discourage the conversion of land to residential or commercial use. The property must be maintained in a qualifying conservation use for a period of 10 years. Because the state offsets the loss of local government property tax revenue stemming from this exemption, this exemption represents a reduction in state tax revenues.

11. Alternative Ad Valorem Tax on Motor Vehicles

As of March 1, 2013, motor vehicles titled in Georgia are subject to a title ad valorem tax, referred to as the TAVT or Motor Vehicle Title Fee. This legislation was passed in the 2012 session of the General Assembly and was substantially amended in the 2013 session. As part of the legislation, sales and use tax on the sale of motor vehicles was eliminated for purchases or leases occurring on or after March 1, 2013.

The tax base is the fair market value, at the time of titling, of new and used motor vehicles registered and titled in the state, including casual sales, dealer sales, leased vehicles, rental and salvage vehicles, and vehicles being brought into the state by people relocating to Georgia. For dealer sales, the tax base is reduced by the value of the purchaser's trade-in vehicle, if any. For dealer sales of new vehicles, the tax base is also reduced by the amounts of dealer rebates and cash discounts, if any. For most transactions occurring on or after January 1, 2020, the fair market value is equal to the retail selling price.

The statutory TAVT rate from January 1, 2020, through June 30, 2023, is 6.6 percent, after which the rate will be 7.0 percent. The revenue from the tax is shared between the state and local governments as specified by law; beginning July 1, 2019, the state and local shares are 35 percent and 65 percent, respectively.

The tax is administered by the Georgia DOR but collected at the local level. All proceeds from the state portion of the TAVT are deposited into the State General Fund. The TAVT generated \$879 million in state receipts for FY 2019 and \$954 million for local governments.

11.004 Reduced rate for vehicles manufactured in years 1963-89

Statute §48-5C-1(d)(17)
 Year Enacted 2012
 Year Effective 2013
 Data Source DOR data
 Estimate Reliability Class B
 Data Reliability Class B
 Note Modified in 2018 to change the treatment of kit and pre-1963 cars.

Description: Vehicles manufactured in years 1963 through 1989 are subject to a reduced state title fee rate of 0.5 percent and reduced local title fee rate of 0.5 percent of the fair market value of the vehicle. This provision allows kit cars to be valued at the greater of: the retail selling price of the kit; the average of the current fair market value; or the current wholesale value of the motor vehicle. Vehicles with a model year prior to 1963, for which a conditional title has been obtained, are allowed to opt into the TAVT system upon payment of a state TAVT payment equal to 0.5 percent of the fair market value of the vehicle and a local TAVT payment equal to 0.5 percent of the fair market value of the vehicle.

State Tax Expenditure	(m)	(m)	(m)
Local Tax Expenditure	0	0	0

(m) Denotes a value of less than \$1 million

12. Special Excise Tax on Consumer Fireworks

An excise tax of 5 percent is levied on gross receipts from the retail sale of fireworks, in addition to any state and local taxes otherwise imposed by law. This tax was enacted in 2015, effective for sales on or after July 1, 2015. The tax is administered by the Georgia DOR and the proceeds from this excise tax are deposited into the State General Fund. The consumer fireworks tax generated \$1.31 million in state receipts for FY 2019.

13. State Hotel-Motel Tax

An excise tax of \$5.00 per day is levied on each room rented or leased. This tax was enacted in 2015 and became effective on July 1, 2015. The tax is administered by the Georgia DOR. Although collections from this tax are deposited into the State General Fund, they must be appropriated exclusively for transportation purposes. The state hotel-motel tax generated \$180 million in state receipts for FY 2019.

Table 1: Summary of Expired Provisions

Expenditure	Summary	Tax	Expiration Date
1.6.024/ 2.6.013	Teleworking Credit	State Individual Income Tax	12/31/2011
1.6.025/ 2.6.014	Qualified Transportation Credit	Total State Credit	12/31/2018
1.6.030/ 2.6.019	Diesel Particulate Emission Reduction Technology Equipment Credit	Total State Credit	12/31/2018
1.6.003	Driver Education Credit	State Individual Income Tax	12/31/2018
1.6.033	Clean Energy Property and Wood Residuals Credit	Total State Credit	12/31/2014
1.6.034	Georgia Employer GED Tax Credit (previously known as the Employer's Credit for Basic Skills Education)	Total State Credit	12/31/2019
1.6.039	Tax credit for water conservation facilities and qualified water conservation investment property	Total State Credit	12/31/2016
1.6.040	Tax credit for shift from groundwater usage	Total State Credit	12/31/2016
1.6.042	Tax credit for purchase of alternative fuel heavy-duty or medium-duty vehicle	Total State Credit	6/30/2017
2.6.023	Georgia Employer GED Tax Credit (previously known as the Employer's Credit for Basic Skills Education)	Total State Credit	12/31/2019
2.6.028	Tax credit for water-conservation facilities and qualified water-conservation investment property	Total State Credit	12/31/2016
2.6.029	Tax credit for shift from groundwater usage	Total State Credit	12/31/2016
2.6.031	Tax credit for purchases of alternative fuel heavy-duty or medium-duty vehicle	Total State Credit	6/30/2017
4.01600	The sale or use of Holy Bibles; testaments, and similar books commonly recognized as being Holy Scripture regardless of by or to whom sold	Sales and Use Tax	2/6/2006
4.02600	Sale of machinery used exclusively for irrigation of crops to persons primarily engaged in producing farm crops for sale (expired December 31, 2012)	Sales and Use Tax	12/31/2012
4.02700	Sales of sugar for use as food to honey bee producers (expired December 31, 2012)	Sales and Use Tax	12/31/2012
4.02800	Sale of cattle, hogs, sheep, horses, poultry, or bees when sold for breeding purposes (expired December 31, 2012)	Sales and Use Tax	12/31/2012
4.02900	Sale of certain types of agricultural machinery (expired December 31, 2012)	Sales and Use Tax	12/31/2012

Table 1: Summary of Expired Provisions

Expenditure	Summary	Tax	Expiration Date
4.02910	Off-road equipment and related attachments used exclusively in site preparation, planting, cultivating, or harvesting of timber by persons primarily engaged in growing or harvesting timber (expired December 31, 2012)	Sales and Use Tax	12/31/2012
4.03310	Partial sales tax exemption for jet fuel sold to or used by a qualifying airline at a qualifying airport	Sales and Use Tax	6/30/2015
4.03400	Certain machinery used in the manufacturing of tangible personal property (expired December 31, 2012)	Sales and Use Tax	12/31/2012
4.03430	The sale or use of repair or replacement parts, machinery clothing, molds, dies, waxes or tooling for machinery (expired December 31, 2012)	Sales and Use Tax	12/31/2012
4.03440	Sale of tangible personal property to or used in or for the construction of a new alternative fuel facility primarily dedicated to the production and processing of ethanol, biodiesel, butanol or their by-products (expired 6/30/2012)	Sales and Use Tax	6/30/2012
4.03500	Certain materials used in industrial packaging (expired December 31, 2012)	Sales and Use Tax	12/31/2012
4.03700	Machinery and equipment used in combating air and water pollution and any industrial material used in a burning or recycling process (expired December 31, 2012)	Sales and Use Tax	12/31/2012
4.04900	Liquefied gases and other fuels used in poultry or pullet houses or structures (expired December 31, 2012)	Sales and Use Tax	12/31/2012
4.04910	Liquefied petroleum gas or other fuel used in a structure where swine are raised (expired 6/30/2010)	Sales and Use Tax	6/30/2010
4.05800	Graduated exemption for the sale of overhead materials used in government contracts (repealed effective January 1, 2011)	Sales and Use Tax	1/1/2011
4.06400	Sale of electricity or fuels used exclusively for the operation of an irrigation system on a farm for crop irrigation (expired December 31, 2012)	Sales and Use Tax	12/31/2012
4.07010	Partial exemption for certain sales of natural or artificial gas, fuel oil, propane, petroleum coke and coal used directly or indirectly in the manufacture or processing of tangible personal property primarily for resale (expired 12/31/2010).	Sales and Use Tax	12/31/2010
4.07300	Sale of certain production equipment to film producers and film production companies (expired January 1, 2013)	Sales and Use Tax	1/1/2013
4.07400	Sale or use of digital broadcast equipment sold to, leased to, or used by a federally licensed commercial or public radio or television broadcast station, a cable network, or a cable distributor	Sales and Use Tax	11/1/2008
4.07500	Sales tax holiday for back to school items (expired July 31, 2016)	Sales and Use Tax	7/31/2016
4.07700	Liquefied gases and other fuels used in structures where plants, floral products, seedlings, and nursery stock are grown for sale (expired December 31, 2012)	Sales and Use Tax	12/31/2012

Table 1: Summary of Expired Provisions

Expenditure	Summary	Tax	Expiration Date
4.07800	Materials used to construct a new symphony hall costing in excess of \$200 million that is owned and operated by a nonprofit organization (expired 9/1/2011)	Sales and Use Tax	9/1/2011
4.07900	Ice used to chill poultry or vegetables during processing or shipment (expired December 31, 2012)	Sales and Use Tax	12/31/2012
4.08000	Materials used to construct an eligible corporate attraction dedicated to history or products of corporation.	Sales and Use Tax	12/31/2007
4.08200	Sales tax holiday for water-efficient and energy-efficient purchases (expired October 2, 2016)	Sales and Use Tax	10/2/2016
4.08400	Tangible personal property used for construction of National Infantry Museum and Heritage Park.	Sales and Use Tax	6/30/2008
4.08500	Sale of tangible personal property sold to "qualified job training organization."	Sales and Use Tax	6/30/2010
4.08700	Sales of tangible personal property used to renovate or expand a zoological institution (expires June 30, 2018)	Sales and Use Tax	6/30/2018
4.08800	Sale of tangible personal property used in the construction of a qualified civil rights museum (expired July 30, 2015)	Sales and Use Tax	7/30/2015
4.08900	The sale of an airplane flight simulation training device (expired 6/30/2011).	Sales and Use Tax	6/30/2011
4.09000	The sale of electricity to a manufacturer located in this state used directly in the manufacture of a product (expired December 31, 2012)	Sales and Use Tax	12/31/2012
4.09200	Sale to an organization defined by the Internal Revenue Service as an instrumentality of the states relating to the holding of an annual meeting in this state for the period commencing July 1, 2012, and ending on December 31, 2013	Sales and Use Tax	12/31/2013
4.09600	Exemption for sales or use of construction materials used for or in the construction of buildings at a private college (expired June 30, 2016)	Sales and Use Tax	6/30/2016
4.09900	Exemption for expenses related to the renovation or expansion of qualified theatres	Sales and Use Tax	1/1/2019
6.00100	Motor fuel tax refunds for agricultural purposes	Motor Fuel Tax	6/30/2015
6.00200	Sale of fuel to mass transit vehicles	Motor Fuel Tax	6/30/2015
6.00300	Sale of fuel to campus transportation vehicles	Motor Fuel Tax	6/30/2015
6.00600	Motor fuel tax exemption for public school buses	Motor Fuel Tax	6/30/2015

Table 2: Sales and Use Tax Expenditures by Type

Expenditure	Summary	State FY 2019	State FY 2020	State FY 2021
Sales Tax Exemption for a Business Input⁴				
4.01700	Sales of fuel or consumable supplies used by ships engaged in inter-coastal or foreign commerce	5	5	6
4.03410	Machinery and equipment used to handle, move, or store tangible personal property in certain distribution facilities	Estimate not available at this time		
4.03420	Machinery and equipment used directly to remanufacture certain aircraft engines or aircraft engine parts	(m)	(m)	(m)
4.03910	Cargo containers and related chassis used for storage or shipping by persons engaged in international shipment of tangible personal property	Estimate not available at this time		
4.04500	The sale or use of paper stock when used to print catalogs for distribution outside Georgia	Estimate not available at this time		
4.04800	Sale of crab bait to licensed commercial fishermen	(m)	(m)	(m)
4.06000	Sale of certain machinery and equipment used to improve air quality in a clean room of Class 100,000 or less	(m)	(m)	(m)
4.06500	Sale of dyed diesel fuel used exclusively for operations of vessels or boats by licensed commercial fishermen	(m)	(m)	(m)
4.06800	Sale of certain computer equipment when the total qualifying purchases by a high technology company exceed \$15 million	Estimate not available at this time		
4.06900	Sales of machinery and equipment and material incorporated and used in a clean room of Class 100 or less	Estimate Combined with 4.06000		
4.07000	Sale of natural gas used directly in the manufacture of electricity	75	80	86
4.08100	The purchase of food and nonalcoholic beverages provided at no charge aboard a qualified airline	3	3	6
4.08300	Sale of biomass materials used to produce electricity or steam intended for sale	1	1	2
4.09400	The sale, use, consumption, or storage of materials, containers, labels, sacks, or bags used for packaging tangible personal property for shipment or sale	Estimate Combined with 4.3.3		
4.3.2	Exemption for energy, machinery or equipment, industrial material, and consumable supplies used in manufacturing	3,710	3,845	3,968

⁴ Sales tax exemptions which are defined primarily as an exemption for a profit making business.

Table 2: Sales and Use Tax Expenditures by Type

Expenditure	Summary	State FY 2019	State FY 2020	State FY 2021
4.3.3	Sale and use by a qualified agriculture producer of agricultural production inputs, energy used in agriculture, and agricultural machinery and equipment	149	150	150
4.3.4	Exemption for qualified boat repairs	(m)	(m)	(m)
Sales Tax Exemption for a Specific Item⁵				
4.00300	Federal retailer's excise tax if separately itemized to the consumer and Georgia motor fuel tax imposed on the sale of motor fuel	Estimate not available at this time		
4.00400	Sales of transportation furnished by a county or municipal public transit system or public transit authorities	6	6	7
4.00500	Sales of transportation furnished by an approved and authorized urban transit system	Estimate combined with 4.00400		
4.01200	School lunches sold and served to pupils and employees of public schools	5	6	7
4.01300	School lunches sold and served to pupils and employees of approved private schools	(m)	(m)	1
4.01800	Charges for transportation of tangible personal property made in connection with interstate or intrastate transportation	Estimate not available at this time

4.05600	Sale by any qualified nonprofit parent teacher organization	(m)	(m)	(m)
4.05720	Exemption for prepared food and food ingredients that are donated to a qualified nonprofit agency and used for hunger relief purposes	3	3	0

⁸ Sales tax exemptions which are specifically defined by the seller.

Table 2: Sales and Use Tax Expenditures by Type

Expenditure	Summary	State FY 2019	State FY 2020	State FY 2021
4.05730	Exemption for food and food ingredients that are donated following a natural disaster and used for disaster relief	(m)	0	0
4.05900	Sale of eligible food and beverages by any Girl or Boy Scout council	1	1	1
4.3.6	Exemption for sales within an enterprise zone	Estimate not available at this time		
4.70000	Compensation of dealers for reporting and paying tax	77	75	80

Tables 3-9: Distributional Tables of Selected Provisions

Tables 3 through 9 provide information on the distribution across Georgia AGI for selected exemptions and deductions from the state personal income tax. The data used to produce the tables is from the state personal income tax files for 2018. It has not been adjusted for inflation nor does it reflect any legislative changes that may have occurred since 2018. Column 1 of each table provides the categories of Georgia AGI. Column 2 (Number of Returns) provides the number of returns for each AGI category. Column 3 (Average Value) gives the average value of the tax exemption or deduction taken by filers in each AGI category. Column 4 (Total) provides the total value of the deduction or exemption associated with each AGI category and column 5 (Percent of Total) provides the percent of the total value of the deduction or exemption that falls into that AGI category.

Table 3: Total Personal Exemptions

	Number of Returns	Average Value	Total	Percent of Total Dollars
GA AGI ≤ 0	348,415	\$4,931	\$1,718,205,000	6.1%
0 <GA AGI ≤ \$25,000	1,518,153	\$5,403	\$8,202,958,700	29.1%
\$25,000 <GA AGI ≤ \$50,000	964,919	\$6,502	\$6,273,599,700	22.3%
\$50,000 <GA AGI ≤ \$100,000	778,977	\$7,612	\$5,929,628,600	21.0%
\$100,000 <GA AGI ≤ \$500,000	583,703	\$9,712	\$5,668,695,500	20.1%
\$500,000 <GA AGI ≤ \$1,000,000	25,280	\$10,485	\$265,057,400	0.9%
GA AGI > \$1,000,000	11,855	\$10,113	\$119,894,500	0.4%
Total	4,231,302	\$6,659	\$28,178,039,400	100.0%

The percent of total column may not sum to 100 percent due to rounding.

Table 4: Retirement Income Exclusion

	Number of Returns	Average Value	Total	Percent of Total Dollars
GA AGI ≤ 0	366,281	\$30,434	\$11,147,432,157	42.3%
0 <GA AGI ≤ \$25,000	208,655	\$27,555	\$5,749,457,328	21.8%
\$25,000 <GA AGI ≤ \$50,000	105,795	\$27,142	\$2,871,465,632	10.9%
\$50,000 <GA AGI ≤ \$100,000	100,063	\$29,178	\$2,919,659,960	11.1%
\$100,000 <GA AGI ≤ \$500,000	78,517	\$39,542	\$3,104,741,151	11.8%
\$500,000 <GA AGI ≤ \$1,000,000	5,278	\$63,294	\$334,064,269	1.3%
GA AGI > \$1,000,000	3,140	\$73,351	\$230,321,275	0.9%
